Professional Profile

Junior Full Stack Developer passionate about programming and problem solving. I recently completed an intensive bootcamp at ISDI Coders, consolidating my web development skills with HTML, CSS, JavaScript, React, and Node.js. I have experience in creating responsive web applications, integrating APIs, and collaborating effectively using agile methodologies. I am seeking a challenging environment where I can continue to grow professionally and contribute innovative solutions.

Work Experience

A.I.F. S.L. – Senior Technician in Robotics and Industrial Automation 2021 – January 2025

- Programmed PLCs and HMIs using Siemens (TIA Portal, LOGO GO).
- Developed HMI interfaces and electrical schematics (EPLAN, SEE ELECTRICAL).
- Programmed Kuka robots and configured frequency converters.
- Worked with industrial communication protocols (Profinet, Ethernet/IP, Profibus, Modbus).
- Coordinated projects from design through to commissioning.

Parc del Garraf i Esportiu – Maintenance Technician 2020 – 2022

- Performed preventive and corrective maintenance on electrical and mechanical systems.
- Diagnosed and repaired industrial equipment.
- Monitored energy consumption and optimized HVAC systems.

A.I.F. S.L. – Advanced Technician Internship 2019 – 2020

- Programmed PLCs and HMIs for custom automation solutions.
- Manufactured electrical panels and configured industrial sensors.

Mercadona S.A. – Manager A 2018 – 2020

- Managed inventory, provided customer service, and coordinated team tasks.

Saysat S.L. – Installer 2016 – 2017

- Installed and repaired telecommunications and video surveillance systems.

Education

Full-Stack Development Bootcamp

ISDI Coders

Jan. 2025 - Apr. 2025

- Improved skills in Front-End and Back-End development, focusing on testing with clean code and SOLID principles. Approx. ~1000 hours of programming and working on several projects.

Technologies and tools used:

Front-End: #JavaScript | #HTML | #CSS | #Sass | #BEM | #TypeScript | #React | #Redux | #Vue | #Vuex | #Firebase | #Bootstrap

Back-End: #NodeJS | #ExpressJS | #MongoDB | #Mongoose | #Passport | #JWT | #API Restful

Code Quality: #Sonarqube | #Jest | #Eslint

Repositories: #Git | #GitHub

Organization and Design: #Trello | #Figma | #Excalidraw

Legacy JavaScript Algorithms and Data Structures, Computer Programming

FreeCodeCamp

Nov. 2024 - Jan. 2025

- Gained a solid foundation in computer science concepts using JavaScript.
- Learned the fundamentals of programming, including variables, functions, and control flow (loops and conditional statements).
- Deepened understanding of key data structures such as arrays, objects, stacks, queues, and linked lists, applying them to solve real-world problems.
- Developed problem-solving skills through algorithmic challenges, learning how to implement efficient algorithms like sorting and searching (e.g., bubble sort, merge sort).
- The course introduced functional programming, including higher-order functions and methods like `.map()`, `.filter()`, and `.reduce()`.
- Learned object-oriented programming concepts such as classes, constructors, and inheritance.
- By the end of the course, honed the ability to think algorithmically and apply JavaScript to build efficient, scalable solutions.

ITS Python

Mecabit

Sept. 2024 - Nov. 2024

- Operations with data types and operators: Evaluated expressions to identify the data types assigned by Python to variables. Performed operations on data and data types. Determined execution sequences based on operator precedence. Selected operators to achieve the desired results.
- Control flow with decisions and loops: Built and analyzed code segments using branching statements. Built and analyzed code segments performing iterations.
- Input and output operations: Built and analyzed code segments for file input/output operations. Built and analyzed code segments for console input/output operations.
- Code documentation and structure: Built and analyzed code segments including function definitions.
- Problem-solving and error handling/Operations with modules and tools.

Industrial Electronics and Automation Engineering

University UPC

Sept. 2015 - Jun. 2020

- Specialization in industrial process automation and robotics.

Higher Vocational Training in Robotics and Industrial Automation

INS Francesc Xavier Lluch i Rafecas

2018 - 2019

Grade: 7

- PLC programming with Siemens TIA Portal.
- Robot programming with KUKA Sim Pro.
- Electrical, pneumatic, and hydraulic systems.
- Programmable sequential systems.
- Measurement and regulation systems.
- Power systems.
- Technical documentation.
- Industrial computing.
- Advanced programmable systems.
- Industrial robotics.
- Industrial communications (Profibus, MPI, Profinet, etc.).
- Integration of industrial automation systems.

Technological Baccalaureate

INS Dolor Mallafre

2016 - 2018

Compulsory Secondary Education (ESO)

Sant Bonaventura School

2012 - 2016

Skills

- **Front-End:** HTML, CSS, JavaScript, React, Vue, Redux, TypeScript, Python
- **Back-End:** Node.js, Express.js, MongoDB, Mongoose
- **Version Control:** Git, GitHub
- **Methodologies:** Agile, SCRUM
- **Tools:** Sonarqube, Jest, ESLint, Figma, Trello, Unity
- **Industrial Automation:** Siemens TIA Portal, LOGO GO, EPLAN, SEE ELECTRICAL
- **Languages:** Catalan, Spanish (native), English (advanced)

Certifications

- Legacy JavaScript Algorithms and Data Structures – freeCodeCamp
- ITS Python – RECURSOS-MECABIT
- Python Programming Fundamentals – RECURSOS-MECABIT
- Cisco Certified CCNA: Introduction to Networks
